**Assistant Professor  
Dept of Pathology  
The University of  
Alabama at Birmingham  
Alabama, USA**

Dr. Aishwarya Ravindran is Assistant Professor of Pathology at the University of Alabama at Birmingham, USA.

She pursued her medical training at Stanley Medical College, Chennai, India.

After her graduation in 2013, she pursued clinical rotations in the United States, and subsequently, in 2015, she joined as a research fellow in Hematology at Mayo Clinic, Rochester, Minnesota.

It was during this time; she developed a special interest in Histiocytic Neoplasms when she encountered a patient with Rosai-Dorfman Disease.

The novelty of this diagnosis triggered her passion to expand her research on these diseases during her pathology residency and hematopathology fellowship training at the Mayo Clinic from 2017-2022.

### Ms. Deanna Fournier

Executive Director, The Histiocytosis Association, a global nonprofit, that is dedicated to addressing the unique needs of patients and families impacted by all histiocytic disorders.

Deanna is also a histiocytosis patient herself, having been diagnosed with LCH at the age of six.

In addition to providing educational and emotional support for families and patients and raising awareness around the world, the association funds several research projects each year.

### Ms. Kathy Wisniewski

She has worked with the Histiocytosis Association and the Histiocyte Society since 2008.

During this period, she has held many roles in both organizations but today her primary responsibilities lie in managing the Histiocytosis Association's Research Grant Program, producing the Association's podcast entitled Beyond the Diagnosis and managing the Histiocyte Society, a global group of over 200 physicians and scientists dedicated to researching histiocytosis, finding better treatments and ultimately a cure.
